The Prestigious Green

Known as “the king of green-coloured gemstone”, emerald is classified as one of the top five precious stones in the jewellery industry. And among all emeralds, Colombian emeralds have always been the standard for thousands of years.

Natural emeralds usually possess surface reaching fractures and or liquid inclusion. The practice of filling fractures is widely accepted and adopted in the industry to enhance the apparent clarity. Natural, untreated emeralds with fewer inclusion are extremely rare in nature and highly prized by investor and gem connoisseurs.

無油祖母綠

擁有「綠寶石之王」美譽的祖母綠是國際珠寶界公認的五大名貴寶石之一，其中又以哥倫比亞出產的祖母綠最享負盛名，成為價值不菲的潛臺詞。

由於祖母綠容易出現裂隙雜質，故曠工在開礦石為了保護寶石，往往會把祖母綠浸泡在油罐裏。故此絕大部分祖母綠都會經過浸油工序，以提高其淨度和美感，並在行內廣泛利用，同時亦能在市場上被接受及肯定。只有品質極為優秀的祖母綠不經過注油，這種純天然、無注油的祖母綠，因其產量稀少而十分珍貴，備受藏家追捧。

2005

Emerald and Diamond Ring

Set with a step-cut emerald weighing 4.01 carats, enhanced with veriously shaped diamonds weighing approximately 2.93 carats in total, mounted in 18 karat white gold, size 5¹/₂.

Origin of the Finest Rubies – Mogok, Myanmar

Mogok is a long-established stone tract in Myanmar and was first discovered to be the source of gemstones 800 years ago and has since remained the world-recognized classical source for the finest quality rubies. It produces the purest and most valuable "pigeon-blood" rubies. Yet the famous Mogok mines are yielding fewer and fewer rubies in recent decades, creating the thirst in the market for the desirable Mogok blood.

Pigeon-blood rubies are the most rare and the first place in colour, beauty and rank among all rubies. Pigeon-blood rubies from the Myanmar Mogok Mine are rich in chromium that allow the gemstones to gleam in a red fluorescent glow; the shade of red flaunts a crimson that is vivid, saturated and lustering, like burning flames and flowing blood.

頂級紅寶石發源地——緬甸抹谷

抹谷是緬甸歷史悠久的礦區，早在800年前，抹谷地區已被發現寶石，也是全世界公認出產最優質紅寶石的礦脈，同時蘊藏著血統最純正、最頂級的「鴿血紅」紅寶石。但近幾十年來，由於礦坑產量驟降，抹谷紅寶石產量也越發稀少，市場對抹谷紅寶石趨之若渴。

「鴿血紅」是諸多紅寶石色澤中最為珍稀罕有的一種，代表了紅寶石的頂級品質，緬甸抹谷礦區的鴿血紅「紅寶石」因其內含豐富的鉻元素以及所產生強烈的螢光效應，使其紅色除了純正、飽和和明亮之外，更給人以強烈的「燃燒的火焰」與「流動的血液」的感覺。

陳世英 Wallace Chan

陳世英Wallace Chan，國際知名珠寶設計師，成長于香港，以其敏銳的感知力及創作力聞名全球。他被譽為「東方珠寶藝術第一人」，他是首位在德國寶石博物館及北京首都博物館舉行個展的當代亞洲珠寶藝術家，也是史上首位及唯一獲邀參家《巴黎古董雙年展》的華人珠寶藝術家，其影響力遍及歐美亞洲。

為追求珠寶的極致表達，陳世英的創作中充滿了不可思議的混搭，却又展現出聞所未聞的驚人美感。陳世英曾用了八年時間進行研究和實踐，探索及改良了太空時代鈦金屬的應用及寶石鑲嵌技術。在2007年的巴塞爾珠寶展，展出以鈦金屬作為高級珠寶骨幹的一系列作品，為珠寶界引進全新的熔融金屬的色調。更難得的是，他的作品，從創意階段開始，包括設計、蠟模制作、寶石選取、加工、鑲嵌全部由他本人參與，而且大多數由他親手完成。

陳世英早期主要以翡翠、玉石作為主要的材料，接觸和面對的主要是中國式的題材，例如花鳥、猛禽和吉祥圖案。華藝國際（香港）首拍呈現陳世英（Wallace Chan）早期的五件杰作。這些作品展現他爐火純青的技藝，其設計充滿東方韻味，佩戴性極強，衝破工藝與珠寶藝術的疆界，引人遐想。

Wallace Chan

Wallace Chan, raised in Hong Kong , known for his powerful sense of beauty and innovative creation. Wallace Chan was the first contemporary Asian jewellery artist to hold a solo exhibition at the Gemstone Museum in Germany and the Capital Museum in Beijing, and also the first and only Asian artist ever invited to exhibit at Biennale des Antiquaries in Paris.

Chan developed a number of innovations through personal experimentation. He has perfected the use of the space-age metal titanium and wondrous gem-setting techniques. In 2007, after he spent 8 years to experiment with titanium, he surprised Basel World 2007 with a series of jewellery creations featuring ethereal titanium structures. In doing so, he introduced a new palette of melting metallic hues and tones to the world of jewellery. Besides, Chan is distinguished among high jewellers because he not only creates the designs but does much of the artisan work himself.

Chan mainly used jadeite and traditional Chinese themes in his early work. Holly's international (HK) is pleased to offer five masterpieces by Wallace Chan. The works demonstrate his supreme mastery, showing the art of oriental charms , and push the boundaries of imagination, craftsmanship and the art of the jewel.

Boucheron

The history of Boucheron dates back to 1858, when Frederic Boucheron established a shop in Paris. Boucheron is the oldest jewellery Maison in Place Vendôme. Famous throughout the world for its bold, free style, and creativity.

Shah of Iran and India king Maharajah of Patiala are remarkable high social and aristocratic clientele of Boucheron house. In 1930, the Shah of Iran only appointed Boucheron to appraise the Imperial Treasure of Iran; whereas Maharajah of Patiala commissioned Boucheron to design 149 jewellery pieces with thousands of diamonds and emeralds from his exceptional treasure.

Boucheron has always been upholding to the brand’s mission: A celebration of life. Of utmost importance, only the highest quality gems are used in every Boucheron jewellery.

寶詩龍

寶詩龍於1858年由費德列克•寶詩龍在巴黎創立，是旺多姆廣場上歷史最悠久的珠寶品牌。寶詩龍以大膽自由的風格享譽世界，創新的精神更是帶領品牌創造出一個個輝煌的成就。

很多權貴顯要都是寶石龍的客戶。1930年，路易•寶詩龍得到伊朗國王的委任，對伊朗國庫進行鑒定。而印度的巴提亞拉土邦主則委託寶詩龍從他珍藏的六箱珍貴寶石中細選數以千計的鑽石及祖母綠來製作149件璀璨瑰寶。

寶詩龍始終堅守品牌的願景，為每一件珠寶挑選最珍貴頂級的寶石，繽紛璀璨，擁抱生命的慶典。

USD 254,000-381,000

Kashmir Sapphire

Kashmir sapphires are unrivalled and set the standards around the world for its distinctive vibrant blue colour and rarity.

Lying at an extreme altitude, Kashmir is also harshly climatic. Accordingly, mining methods at Kashmir deposit have always been primitive. Even today, the mines remain accessible only by foot or helicopter. First discovered in 1881 as the chance result of a landslide, the mining of the Kashmir sapphire deposit came to an end after a short span of less than ten years.

Kashmir sapphires show an exquisite and rich cornflower blue, which exhibits an unrivalled depth of colour. This distinctive texture made these stones tremendously sought-after by gem connoisseurs.

喀什米爾藍寶石

喀什米爾藍寶石以其美輪美奐的濃郁色澤以及稀少珍貴的礦產資源享譽全球。

喀什米爾地區海拔高，氣候嚴峻，故喀什米爾礦區一直沿用原始的開採方法。時至今日，礦區仍只可以步行或直升機到達。這個礦區於1881年因山崩首次被發現，只開採了不到十年，在1889年官方宣告開採結束。

喀什米爾藍寶石呈現獨特濃郁的「矢車菊」藍，色澤深邃無比，展現如絲絨般的微妙光華，被公認為世界頂級藍寶石，令全球珠寶藏家趨之若鶩。

木那料翡翠原石局部
Part of the raw jadeite stone

The conditions for jadeite formation are extremely demanding: rocks of specific mineral composition must be exposed to a long process of earth's crust activities of high pressure and low temperature. Consequently, the occurrence of jadeite in nature is very rare. However, due to the unique and fortuitous geological environment of Myanmar, the country produces the majority of the best jadeites in the world. Even so, they only occur infrequently, and it is genuinely a luxury to own a piece of top-quality jadeite.

Unlike diamond and other gemstones, jadeite has a very delicate and varying composition. Its complex aggregate structure renders it susceptible to impurities and cracks, as well as variations even within the same stone. Two jadeite materials from the same stone can vary drastically in colour, texture, translucency and purity, making it extremely difficult to produce matching jewellery sets. Even more difficult is carving a full-coloured decorative piece from one whole stone. The tone has to be kept consistent throughout and void of all cracks and impurities.

This spring, Holly's International(HK) is pleased to offer five works from one whole stone(Lot2040 to Lot2044). The original whole stone weights about 233 kilograms and was the 'top bidder' in Burma public jadeite market in 2014.

翡翠的形成條件非常苛刻，在低溫高壓的環境下，擁有特定礦物含量的岩石，經過長年累月的地殼運動才形成。全世界只有緬甸擁有這樣特殊的地質環境，生產最頂級細緻的翡翠原石。翡翠產量不但稀少，而且質素參差，超過一萬塊原石里也未必有一塊好材料，因此擁有上等質量的翡翠絕對是萬中無一。

翡翠有別於鑽石或其他寶石，它擁有非常細緻的結構和變化，這全靠其複雜的多晶體結構所致，然而亦同時令翡翠容易包含瑕疵和裂紋。即使是出自同一塊原石的兩件翡翠，其色澤、質地、水份、淨度都可以擁有很大的區別，因此翡翠項鍊或珠鏈的匹配一向是最大的難題。如要把翡翠原石切割並雕刻成為一件種水俱佳且帶色的擺件，對原石的要求便更是嚴謹，要保持整件雕刻的顏色勻稱和完整性而避開所有裂紋，困難之大可想而知。

華藝國際（香港）春拍呈現5件來自同一塊原石的作品（Lot2040-2044），這塊原石曾是2014年緬甸翡翠公盤的標王，重達233公斤的「木那料」原石，更難得的是該原石為春帶彩，邊緣部分為正陽綠色，內部為紫色。「木那料」是翡翠市場上公認高檔翡翠的種料，以瑩潤清澈的水頭、鮮艷美麗的綠色，令無數收藏著追捧，即使「木那料」的翡翠基本帶有明顯的點絮狀棉，但仍沒有影響其在市場上的地位。出自標王的五件作品包括光潔瑩潤的翡翠手鐲、種水俱佳的「平安無事」翡翠掛件，還有獨一無二、榮獲殊榮的翡翠擺件，實屬難得。

2040

Jadeite Bangle

The circular colourless jadeite bangle of very high translucency, graduate to bright green colour. Inter diameter and thickness measuring approximately 57.3mm and 8.3mm.
